

Corporate Screening Expands into New Office Location

Middleburg Heights, Ohio (October 5, 2007) -- Corporate Screening Services (www.CorporateScreening.com), a leading pre-employment screening and background investigations firm, has relocated its management and administrative functions to the Interstate Plaza office building, adjacent to the company's current operations center in Middleburg Heights, Ohio.

Corporate Screening will occupy 4,000 square feet on the third floor of the Interstate Plaza building, located at 16600 Sprague Road, Middleburg Heights, Ohio, 44130. The new space will house the company's 15-person management, accounting, sales and marketing functions. Corporate Screening will maintain its 13,000 square foot, 65-person operations center next door at 16530 Commerce Court.

Ongoing growth has necessitated the expansion, according to Dennis Drellishak, president and founder of Corporate Screening. "Our hires have been up 10 percent in 2007, which is the direct result of a 30 percent increase in business. And all indications point to maintaining this trend," he commented. "The space availability at Interstate Plaza affords us the ability to continue our expansion without moving from the area."

About Corporate Screening

Corporate Screening (www.CorporateScreening.com) is a Cleveland-based provider of pre-employment screening and background investigations for some of the nation's top employers. As a leading investigative consultant to human resources and corporate security professionals, Corporate Screening combines state-of-the-art data gathering technology with in-depth examination and analysis to verify information and mitigate the risks associated with hiring employees. With offices in Cleveland, Tampa and Northern California, Corporate Screening utilizes an expanding professional staff of 80 analysts and consultants to service the needs of hiring professionals representing a full spectrum of industries, with special emphasis on healthcare, financial services and manufacturing sectors.
